## YOU CAN HELP PREVENT FOREST FIRES

---

Twenty-five percent of all forest fires in New Hampshire are caused from careless debris burning — brush, paper, leaves, grass, etc. Most of them are started without the required permit from the local forest fire warden. The cost of extinguishing these fires annually runs into large sums of money.

According to law, responsible parties must pay the cost of putting them out. In addition, violators may be subject to court prosecution with fines running as high as (\$200) two-hundred dollars.

In the interest of fire prevention why not eliminate burning at home? Use your town dump. It has been set up for your personal convenience. It provides a suitable place for the disposal of dangerous inflammable waste material and other useless items which accumulate around the home and local stores; brush, etc. cut on your property. Eliminate the hazard of burning yourself. It will be easier for you—personally and financially.

If, however, you do burn on your premises:

1. **Secure a permit from your local forest fire warden—the law requires it.**
2. **Be sure to properly supervise your burning. Don't leave it.**
3. **Make certain your fire is DEAD OUT before leaving it.**

**Save yourself much possible difficulty, Use your town dump.**

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Salisbury:

I must, first of all, express to you my sincere congratulations for the success of your enterprise of securing a new school for your community. Words cannot always convey the deep feeling of satisfaction which one may have in seeing an idea bear fruit. The people of Salisbury who promoted the new school idea are now experiencing this feeling of satisfaction, I am sure. All of you who have contributed in any way to the local effort will be proud, as time goes by, that you had a share in the work. There is inherent within us a sense of personal pride when we are a part of any effort that helps to improve our community. Certainly it is true that providing good schools and adequate educational opportunities for children is a very worthwhile task to be engaged in. For your efforts in this area of planning you are to be praised. You will, I hope, accept my modest words of commendation which I extend at this time.

I would also like to suggest that more of you citizens and friends take an active interest in schools and education - especially in your own children's education. You should visit schools more often. When we get into the new building I hope more of you will. It is, unfortunately, sometimes said that many people who visit schools come only to criticize, to find fault with the teachers or with conditions within a school. Generally speaking this is not true. Such a feeling of misunderstanding should not be allowed to go on to the extent that it discourages visiting our schools. Teachers and parents can be happier together if they become interested in a mutual project of helping children. Little personal touches between teacher and pupil are often the result of good parent-teacher relations. When you stop to think that teachers spend more time in close supervision of children than many parents; that while at school they act in place of the parents - then you are more aware of the need for close relationship between teacher and parent.

May I extend to you my thanks for the interest and cooperation which you have shown to teachers, to your local school board, to your Building Committee, and to myself during the past school year.

Respectfully submitted,

WILLIAM B. HOUNSELL,

Superintendent of Schools

## REPORT OF SCHOOL COMMITTEE

---

At the last Annual District Meeting, the school board was given authority to pick a site for a new school, to negotiate a bond issue and to let contracts for the new building.

The board meeting with the same men who served on the committee last year, namely Max Parris, Frederick Adams and Arthur Schaefer also with Superintendent of Schools, William Hounsell and Irving Hershey, architect, found that the amount voted to raise was in excess of the borrowing power allowed by a small amount, so it was necessary to make application for permission and to have a meeting with the State Investigating Committee. This permission was granted.

We picked the site in the so called Muster Field. Then made application for the bond issue, which due to unforeseen circumstances, took much longer to negotiate than we expected, but finally came through.

We then purchased five acres in the Muster field.

The bids on the contracts were opened and Armand Roux of Laconia was awarded the contract for the building as he was low bidder. The low bid for the well was awarded to The Con-toocook Artesian Well Co.

The well is completed, being 325 feet deep with a flow of 30 gallons per minute which should be sufficient for any school needs now or in the future.

The foundation of the building is completed and other work started, but due to the extremely cold weather and winds, they have been forced to suspend work for a while but hope to be able to resume work soon.

Respectfully Submitted

MRS. ARVILLA FOGARTY
